# Serological Pipette

Clear and bidirectional graduations on the pipette, negative graduation.  
Allows additional working volume.  
Our innovation guarantees your pipetting with improved accuracy and flexibility.

Color-coded packaging for sorting and selecting  
Filter plug prevents overflow.  
Certified: DNase-Free, RNase-Free, Endotoxin-Safe.

GEB produces pipette tips with exclusive techniques of TWC Thin Wall Crown and R&R Low Retention so that the cooperation between pipettor and tip is optimized.

The liquid handling will be more accurate and flexible with GEB pipette tips.

# Tubes

## Optimum Sample Handling

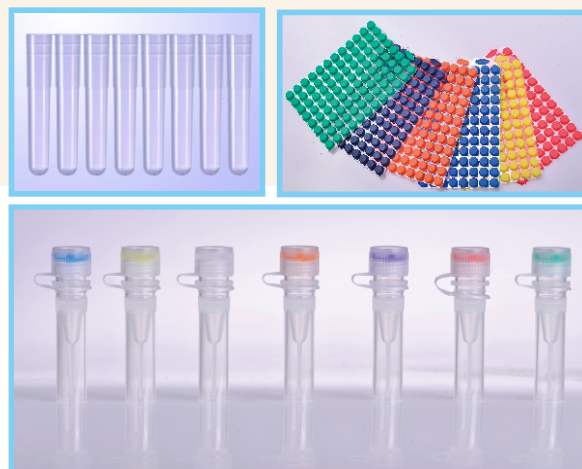

Optimum safelocker design, high quality virgin resin, R&R GEB retentionless recovery technique, etc., will help you to optimize your sample handling.

-----  
Proteomics.Drug R&D.Genomics.HTS

GEB **DUAL SNAPLOCK** system provides you double cap lock for micro centrifuge tubes with a safer leakproofness to protect your reaction systems or biological solutions.

**DUAL SNAPLOCK** system also creates a "half lock" status which provides a flexible position during your multiple reagents processing steps.

Unique O-ring integrated design ensures better protection for your reagents

### Features:

- Glass-like transparent tubes are also available in seven additional colours.
- Snap-lock tubes are guaranteed to stay closed, even during boiling or autoclaving.
- Withstand up to 20,000 RCF.
- Snap-lock cap ensures efficient seal, yet is still easy to 'flip' open.
- Thin membrane in the caps centre allows easy piercing by syringe needle.
- Certified RNase, DNase, protease and endotoxin-free for total sample integrity.
- Apparent scale identification to facilitate control of liquid volume.

# Sponge Swab

FOR ORAL FLUID AND CELL COLLECTION SYSTEM

This sponge swab is designed to collect oral fluid and cells. The swab is used like a toothbrush. Firstly open the package and remove the tube.

Oral fluid or cells are collected by rubbing the sponge firmly along the gum (at the base of the teeth if present) until the sponge swab is wet. It takes about one minute.

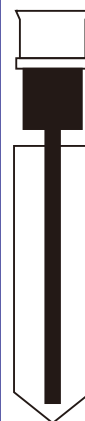

Replace the swab in the tube and close the cap. Return sample to the laboratory for processing

This product can do not need to use the centrifuge and can recycle oral liquid and cells, operation is as follows

Place the swab upside down in the tube

Close the cap, the cap can squeeze liquid

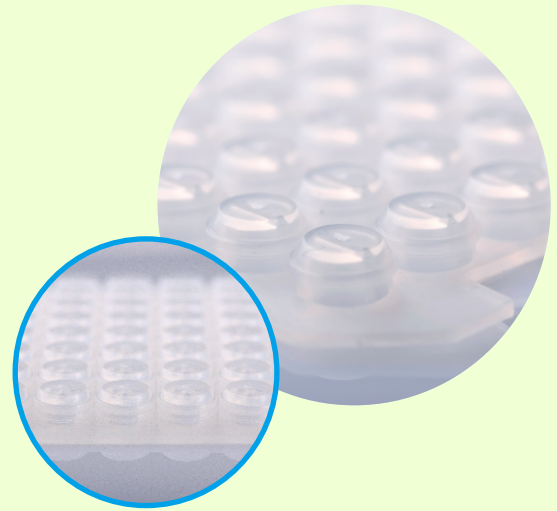

Liquid recovery can be achieved >93%

# Reservoirs

## Optimum sample collection and storage

GEB exclusive R&R Low Retention technique provides Reservoirs with the optimum sample and reagent saving effect

High Throughput Screening(HTS)•Samples & reagents storage

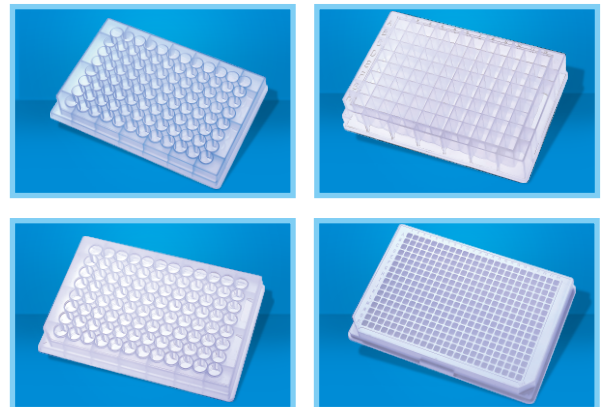

### O-ring

Special designing of O ring which optimizes leakproofness and makes closing and opening more easily.

### GEB R&R Low Retention Technique

GEB's **R&R** liquid reservoirs provide you a maximum saving effect for biological solutions including samples and reagents to guarantee accurate and repeatable results.

#### Features:

- Polypropylene can be autoclavable at 121°C and it is also long-term stable at -80°C.
- U-shaped and V-shaped bottom outlet series most suitable for mixing and collection of samples.
- Alphabetical sorting and cut angle mark for convenient tracking of samples.
- Applicable to multi-channel pipettors and automation systems.

# Sealing Mats

## Optimum Leakproofness

Drug discovery • Molecular biology • Cell biology

### Exclusive Designed O ring

GEB Seal Mats for Deep Well Plates & Sample Tubes have an exclusive O ring structure, which makes GEB Seal Mat seal a plate more easily with a perfect sealing effect.

#### Features:

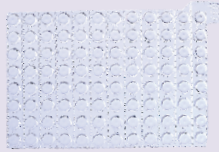

- The most complete line of sealing products in the industry, for the most choices.
- EasyPress and MiniSealer offer easier-operating and time-consuming options.
- A wide range of ImpermaMats offer unsurpassed protection for Volatile solvents.
- Films and mats can be used in a wide temperature range, they are suitable for most applications.
- Chemically resistant, pierceable thermoplastic elastomer well caps are excellent for storage to -80°C.
- Silicone pre-slit well caps permit a pipette tip or probe to enter the well without damage to the cap.
- Ethylene-vinyl acetate cap mats effectively seal polystyrene DeepWell™ plates.

DPMS-9-W+	Natural	Common	"+" Hole	10 mats per bag, 5 bags per case
DPMS-9-WS+	Natural	Pre-Sterilized	"+" Hole	10 mats per bag, 5 bags per case
DPMS-9-IMP-W+	Natural	Chemically Resistant	"+" Hole	10 mats per bag, 5 bags per case
DPMS-9-IMP-WS+	Natural	Pre-Sterilized Chemically Resistant	"+" Hole	10 mats per bag, 5 bags per case

Fit DP12VS-9-N/DP22VS-9-N

### 384-well Reservoirs Sealing Mats for Square Well plates

**Packaging Specification:**

Carton Size:465\*155\*135mm Weight:1.80kg

GEB Cat#	Color	Type	Description	Packaging Specification
DPMS-3-W+	Natural	Common	"+" Hole, Φ=7.3	10 mats per bag, 5 bags per case
DPMS-3-WS+	Natural	Pre-Sterilized	"+" Hole, Φ=7.3	10 mats per bag, 5 bags per case
DPMS-3-IMP-W+	Natural	Chemically Resistant	"+" Hole, Φ=7.3	10 mats per bag, 5 bags per case
DPMS-3-IMP-WS+	Natural	Pre-Sterilized Chemically Resistant	"+" Hole, Φ=7.3	10 mats per bag, 5 bags per case

Fit DP12VS-3-N/DP19VS-3-N
